Qualities of winning children + “Habits of winners.

Do you want to make your parents proud, below are the qualities of winners, as taught by Dad, Mugisa?

- i. Read books and research
- ii. Work hard to be the best
- iii. Wake up early and do house chores e.g. cooking, mopping and digging
- iv. Pay attention in class
- v. Are disciplined. Write well. And greet elders.
- vi. Lead and guide others.
- vii. Pay attention to details
- viii. Have nice handwriting
- ix. Take care of themselves and their belongings e.g. books and clothes
- x. Never give up or quit. Practice daily.
- xi. Are focused. Have nice friends.

i) Read books and research.

Source: Internet photo

To research means to look for books i.e. search on the Internet, buy textbooks from the bookshop, and find practice books. If you can, go to the school library and borrow books.

You must work hard and read to be among the top 5. This means you read all the books your parents bought for you or you bought for yourself examples, novels, textbooks, and exercise books.

You must work hard and aim to be among the top five. Remember, always read the books for example, when they buy for you a textbook you have to read each and everything in it like the public speaking book. Even better, read ahead of the class teacher so that by the time the teacher covers the topic, you already have some ideas.

Thank you and just remember that your mind is your greatest weapon.

ii. Work hard to be the best

Source: Internet photo

To work is to be the best in class just read your books and research like when we were in topic 1.

To be the best is to be knowledgeable and highly exposed to many things for success and to be top 5 and win like an academic giant.

There is nothing that comes for free. Winners invest time and energy. They practice. Practice and practice even more. You must read every page in the book. Look after your books well and also write neatly and keep your books organized. That is a secret of winners. They are hard-working.

The world is not for lazy people.

Thank you and just remember your mind is your greatest weapon. Use it well.

iii. Wake up early and do house chores e.g. cooking, mopping and digging.

Source: Internet photo

It means that you must wake up early at exactly 5:00 am and help your parents' mop the house Fetch water and sweep the compound then you go to your study room if you have, at exactly 6:00 am, you get all your Textbooks and revise then at 6:30 am you cook food for your parents and wash your clothes at 7:00 am and make your time table.

Then at 7:30 am you go to the kitchen and help your mother prepare the breakfast for your family then at 8:00 am clear the table after eating you go out in the sun and help your mother sundry the clothes

Thank you and just remember that your mind is your greatest weapon.

iv. Pay attention in class

Source: Internet photo

It means you must listen in class whenever the teacher is teaching. Focus. Pay attention to the teachers. Be attentive and listen so that you don't disturb the rest.

It means you need to take notes as you listen to the teacher. You have to put the teacher's words in your permanent memory. This means you practice after the lesson.

You have to aim higher, the best in class and that means you must work hard.

To be amazing, to be ahead of others.

There is no pain without gain and hard work pays. Remember that always when things seem difficult.

There is something very important and it is to go to Heaven. Before you go there, first go there while on earth. That means being the best. Winning. And gaining opportunities to succeed. Then doing good. That way you prepare your future well.

Thank you and just remember that your mind is your greatest weapon.

v) Are disciplined write well and greet elders.

Source: Internet photo

It means you must practice how to write well. Don't write like doctors whose things many never understand. Practice how to write the letters well so that teachers can read your handwriting. Also, remember to be disciplined by respecting elders and prefects. You need to listen to the class captain. Also, discipline means you greet elders in the morning or evening.

There are important things that give you marks and one of them is writing well.

Remember what our parents always say to us, when you are disciplined it means you are likely to become successful. If you are disciplined, you are good and everyone will be you be your friend. Your parents will be proud of you.

There are stupendous things if you listen.

For emphasis:

You need to read hard to be the best to work hard and to be the top 5. Write well teachers will love your work and tell your parents you are good because of your handwriting and good answers. To greet elders is to greet people you pass by e.g. parents, grandparents, nephew, pedestrians. These will always love you.

That way you become a good child.

vi. Lead and guide others

Source: Internet Photo

To lead means to help others to aim higher than you are.

To guide means to be helpful and whenever they are lost, you help them to locate the place it means you are a good leader. You don't just talk. You show people the way.

You tell them things they do not know.

Good children are not proud. They do not abuse elders and fellow children. They are focused on and help others who need help by asking.

When did you last lead and guide someone who is lost or does not know the answer?

Thank you and just know that your mind is your greatest weapon.

vii. Pay attention to details i.e. Have nice handwriting. Take care of themselves and their belongings e.g. books and clothes.

Source: Internet photo

What they mean by the word pay attention to details means you look after your things. You don't see rubbish and just continue playing as if it is not there. You stop and collect it and drop it in the rubbish bin or tell your parents or teachers about the rubbish. It means you keep your rooms clean and clothes organized.

You have to be organized and have nice handwriting. You avoid small or lazy mistakes like misspellings in your work.

You must take care of yourself and your clothes. And books. If you go to school with a textbook, you must look after it so that it is not stolen.

Thank you and just remember that your mind is your greatest weapon.

viii) Never give up or quit. Practice daily.

Source: Internet photo

It means when you have failed, you must repeat that work or if you have just started it means that you should never give up or quit. You finish whatever you start and aim to be the best.

Practice daily means that you must always repeat by reading your notes and books. Be attentive to details and always do work more than the number you have failed. That way, you learn from your experience and things go into your permanent memory.

Thank you and just remember that your mind is your greatest weapon.

Use it well.

ix) Are focused. Have nice friends.

Source: Internet photo

Who are your friends? Are they hardworking? Do they pay attention in class or they keep playing even when the teacher is around? If yes, such children are not focused. You need friends who are disciplined. Read their books and do not disturb.

Always have good friends. The people who encourage you to read hard. The children who are focused.

If someone is always failing in class, makes noise and is not hard-working, avoid such people because they may discourage you.

When you focus on working hard you score good marks. If you score good marks, teachers love you.

People who score good marks always want to associate with those who score good marks. Those are the friends you need since they are also focused.

Nice friends do not fight with you. They share and always discuss good things.

Thank you and just remember that your mind is your greatest weapon.

Ends.
